Tyco Electronics' product portfolio now includes a comprehensive range of passive components, including surface mount and leaded resistors, trimmers, potentiometers, PTC and NTC surface mount thermistors, as well as a wide range of inductive products covering wirewound, metal film surface mount, ceramic and ferrite bead.

A range of Capacitors, comprising SMD Multilayer Ceramic (MLCC) and Tantalum plus SMD, Radial, Axial and

Snap-In Aluminium Electrolytic completes the Passive Components portfolio.

The range of Holsworthy precision resistors meets the requirement for economically priced components for both industrial and military applications. In SMD and leaded packages, with tolerances down to 0.05% and TCRs as low as 5ppm, the Holsworthy precision resistors range from Tyco Electronics delivers the "Complete Precision Portfolio".

For all trimming solutions, the Citec brand is the ideal design partner where your circuit requires sealed or unsealed trimmers from just 2mm square. Multiturns for precision trimming are available with 11 or 12 turn setability. A prestigious range of Citec potentiometers, from single and multiturn versions with cermet or carbon elements, through to switched options with shafts in either plastic or metal is also offered.

Sigma noise suppression and protection inductor chips from Tyco Electronics can help protect circuits in a variety of ways.

The range offers solutions for high power, high speed, low frequency noise impedance as well as temperature responsive resistors in PTC and NTC. Sigma also encompasses a wide range of wound, multilayered and printed

inductors in addition to noise reduction bead inductors and through-hole RF chokes.

CGS high power and high voltage resistors are rated up to 100W with voltage proof to 50kV and are available in a wide variety of package styles. The CGS high power and pulse resistors range are capable of dissipating up to 25,000 Watts for applications such as regenerative braking and power supplies.

Neohm commodity resistors are available with SMD and Leaded devices. This wide range of products compliments and supports the Passives range available from the Tyco Electronics portfolio.

0805 Size Tantalum Capacitors

Type TYTP Series

Type TYTP Series

The TYT series of moulded solid Tantalum chip capacitors is designed for high solder heat resistance and ease of automatic placement. The product is provided with both excellent frequency and impedance characteristics.

The four different product types cover the majority of requirements for this product series.

TYTS series is the standard type used in many industries and TYTM series extends this product range by applying advanced manufacturing technology, thereby allowing reduced sizes and extended value range.

TYTP series allows even further miniaturisation offering many values in an 0805 package size.

The series is completed with the TYTR series whch offers a comprehensive range of low ESR products.

How to Order

Low ESR Tantalum Capacitors

Type TYTR Series

Type TYTR Series

The TYT series of moulded solid Tantalum chip capacitors is designed for high solder heat resistance and ease of automatic placement. The product is provided with both excellent frequency and impedance characteristics.

The four different product types cover the majority of requirements for this product series.

TYTS series is the standard type used in many industries and TYTM series extends this product range by applying advanced manufacturing technology, thereby allowing reduced sizes and extended value range.

TYTP series allows even further miniaturisation offering many values in an 0805 package size.

The series is completed with the TYTR series which offers a comprehensive range of low ESR products.

Multilayer Ceramic Chip Capacitor

Type TYC Series

Type TYC Series

Multilayer ceramic capacitors (MLCC) are manufactured by suspending ceramic powders in liquid and casting into a thin green sheet from 20mm in thickness to 5mm or thinner.

Metal electrodes are sieved printed onto green sheets, which are later stacked to form a laminated structure. The metal electrodes are arranged so that the termination alternates from one edge to another of the capacitor.

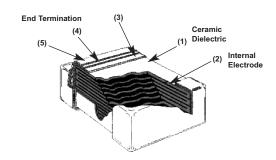

Upon sintering at high temperature the part becomes a monolithic block, which can provide an extremely high capacitance in small mechanical volumes.

Finally, the termination electrodes are formed by composite of outer metal-glass electrode and followed by a barrier layer and pure-tin plating to permit MLCC to be soldered directly onto printed circuit board.

SMD Aluminium Electrolytic Capacitors - Product Overview

The TYE Range SMD V-Chip type Aluminium Electrolytic capacitors are designed for use throughout many industries in a broad range of applications.

The TYEV series is suitable for general purpose applications, the TYEH range is a high temperature version, up to 105 degrees Celsius, for use in more demanding situations.

The TYEE series provides low impedance and higher ripple current capabilities at extended temperatures from -55 to +105 degrees Celsius.

The TYEL series offers long service life and high temperature rating for increased reliability requirements.

The TYOH series is constructed from an Organic Conductive Polymer dielectric. This ensures ultra-low impedance and high ripple current ratings at extended temperatures for reliability under extreme conditions.

All are supplied on tape and reel for use with automatic placement equipment.

- · Vertical-Chip type case style
- · Tape and reel packaging
- 15" diameter reel size
- · Suitable for high density PCB population
- · Designed for reflow soldering
- · RoHS compliant

Radial Leaded Aluminum Electrolytic Capacitors

Type TYRL Long Life Series

Type TYRL Series

Tyco Electronics radial leaded aluminum electrolytic capacitors are designed for through-hole PCB population where board space is restricted.

The TYRL series offers long service life over an extended temperature range from -40°C to +105°C (-25°C at 450Vdc) and high ripple current for unit size.

Suitable for a broad range of filtering, bypassing, power supply, ballast, coupling/decoupling, tele-communications and audio-video applications requiring reliability under more demanding conditions.

Key Features

- Long life polarized aluminum foil electrolytic capacitors
- Radial leads
- Aluminum case with insulating sleeve
- Up to 10000 hours load life assured
- 105°C temperature rating
- High ripple current per unit size
- RoHS Compliant
